

## Technology and Intellectual Property

Osborn Maledon's multi-disciplinary technology and intellectual property practice focuses on serving the needs of emerging and established business clients. We assist our clients in acquiring, exploiting and transferring proprietary assets and businesses.

### Representative Matters

- negotiating and drafting a wide variety of technology agreements including purchase, sale, license, lease, distribution, research and development, supply, contract manufacturing, confidentiality and joint venture agreements;
- counseling small-to-medium size high technology companies involved in diverse fields;
- counseling emerging companies in developing programs to protect their intellectual and other proprietary assets;
- representing companies in acquiring, leasing and licensing computer hardware and software;
- representing software developers in licensing their products;
- counseling life science companies regarding the license and transfer of biological materials;
- representing trademark owners before the United States Patent and Trademark Office, including prosecuting applications, responding to office actions, and pursuing oppositions and appeals;
- representing sellers and acquirers of technology companies and product lines.
